

DXP Catalyst

Design Tokens and Brand System

Site Replatform — v1.0

1. Color Palette

Brand Blue #285197 Primary CTA, links, accents, active nav	Brand Charcoal #333333 Primary text, headings, logo wordmark	Dark Navy #1A1F2E Hero backgrounds, dark sections, footer	White #FFFFFF Page background, card backgrounds, reversed text
Light Gray #F8F9FA Alternate section backgrounds, input fields	Border Gray #E5E7EB Dividers, card borders, table rules	Mid Gray #6B7280 Secondary text, captions, meta info	Blue Tint #EEF3FA Subtle highlight, callout backgrounds

Usage Rules

Token	Use
Brand Blue (#285197)	CTA buttons (primary), links, active nav state, section accents, icon fills
Brand Charcoal (#333333)	All body text, headings, nav links, footer text
Dark Navy (#1A1F2E)	Hero section background, dark CTA banner, footer background
White (#FFFFFF)	Main page background, card backgrounds, text on dark backgrounds
Light Gray (#F8F9FA)	Alternating section backgrounds (e.g. About, testimonials strip)
Border Gray (#E5E7EB)	Card borders, horizontal rules, table grid lines
Mid Gray (#6B7280)	Meta text, publish dates, captions, placeholder text
Blue Tint (#EEF3FA)	Callout boxes, two-track framework highlight, insight card hover

2. Typography

Gilroy is used exclusively across the site for all typographic roles. Five weights are available: Light, Regular, Medium, Bold, Heavy. Font files are self-hosted via `next/font/local` in Next.js.

Type Scale

Role	Weight	Size	Line Height	Use
Display / Hero	Heavy	56–64px	1.1	Hero headline only
H1	Bold	40px	1.2	Page titles
H2	Bold	28px	1.25	Section headings
H3	Medium	20px	1.3	Card titles, sub-section headings
H4	Medium	16px	1.4	Nav links, labels, small headings
Body Large	Regular	18px	1.6	Lead paragraphs, hero subheadline
Body	Regular	16px	1.6	Standard body copy
Body Small	Regular	14px	1.5	Secondary descriptions, card copy
Caption / Meta	Light	12px	1.4	Dates, captions, footnotes
Button / CTA	Bold	15px	1	Button labels, nav CTA
Nav Link	Medium	15px	1	Primary navigation

`next/font/local` Implementation

```
// lib/fonts.ts

import localFont from 'next/font/local'

export const gilroy = localFont({

  src: [

    { path: '../public/fonts/Gilroy-Light.ttf', weight: '300', style: 'normal' },

    { path: '../public/fonts/Gilroy-Regular.ttf', weight: '400', style: 'normal' },

    { path: '../public/fonts/Gilroy-Medium.ttf', weight: '500', style: 'normal' },
```

```
{ path: '../public/fonts/Gilroy-Bold.ttf', weight: '700', style: 'normal' },

{ path: '../public/fonts/Gilroy-Heavy.ttf', weight: '900', style: 'normal' },

],

variable: '--font-gilroy',

display: 'swap',

})
```

Font files (.ttf) placed in /public/fonts/. Applied globally in app/layout.tsx via the CSS variable --font-gilroy. Tailwind config maps font-sans to this variable.

3. Spacing System

Base unit is 4px. All spacing uses multiples of 4. Tailwind's default spacing scale covers this. Named tokens below map to common layout needs.

Token	Value	Tailwind Class	Use
space-1	4px	p-1 / m-1	Micro gaps, icon padding
space-2	8px	p-2 / m-2	Tight internal spacing
space-3	12px	p-3 / m-3	Form field padding
space-4	16px	p-4 / m-4	Standard component padding
space-6	24px	p-6 / m-6	Card internal padding
space-8	32px	p-8 / m-8	Section sub-spacing
space-12	48px	p-12 / m-12	Between components in a section
space-16	64px	p-16 / m-16	Section padding (mobile)
space-24	96px	p-24 / m-24	Section padding (desktop)
space-32	128px	p-32 / m-32	Hero vertical padding

4. Layout and Grid

Element	Value	Notes
---------	-------	-------

Max content width	1200px	max-w-screen-xl centered with auto margins
Narrow content width	800px	Used for body copy, blog posts, case studies
Page horizontal padding	24px mobile / 48px desktop	px-6 md:px-12
Nav height	72px	Fixed, sticky top
Section padding	64px mobile / 96px desktop	py-16 md:py-24
Card border radius	8px	rounded-lg
Button border radius	6px	rounded-md
Card shadow	0 1px 3px rgba(0,0,0,0.08)	shadow-sm
Grid columns	12-column	Standard Tailwind grid
Breakpoints	sm:640 md:768 lg:1024 xl:1280	Standard Tailwind breakpoints

5. Component Tokens

Primary Button (CTA)

Background: #285197 | Text: white | Font: Gilroy Bold 15px | Padding: 12px 24px | Radius: 6px | Hover: darken 10%

Secondary Button

Background: transparent | Border: 2px #285197 | Text: #285197 | Font: Gilroy Bold 15px | Padding: 12px 24px | Radius: 6px | Hover: fill blue

Nav Link

Font: Gilroy Medium 15px | Color: #333333 | Hover: #285197 | Active: #285197 with underline or indicator

Nav CTA Button

Primary button style, slightly smaller: padding 10px 20px | Always visible in header, persists on mobile

Service Card

Background: white | Border: 1px #E5E7EB | Radius: 8px | Shadow: shadow-sm | Hover: shadow-md, border #285197 | Padding: 32px

Insight / Post Card

Background: white | Border: 1px #E5E7EB | Radius: 8px | Hover: shadow-sm | Tag label in Brand Blue | Padding: 24px

Testimonial Card

Background: #EEF3FA | Radius: 8px | Quote in Gilroy Medium 18px #333333 | Attribution in Gilroy Regular 14px #6B7280 | No border

Case Study Card

Background: #F8F9FA | Border-left: 3px solid #285197 | Radius: 8px | Client type in Gilroy Light 12px uppercase | Title Bold 18px

Section CTA Banner

Background: #1A1F2E | Text: white | Headline: Gilroy Bold 28px | Subtext: Gilroy Regular 16px | CTA: Primary button

HubSpot Form Wrapper

Background: white | Border: 1px #E5E7EB | Radius: 8px | Padding: 32px | Max-width: 640px

6. Logo Usage

Context	Logo Variant	File
Light backgrounds (most pages)	Full color	DXP-logo.png
Dark / navy backgrounds (hero, footer)	White version	DXP_Catalyst_Logo_-_White.png
Favicon / small usage	Icon mark only	Crop from DXP-logo.png

- Minimum clear space around the logo: equal to the height of the D letterform on all sides
- Never stretch, recolor, rotate, or add effects to the logo
- Never place the full-color logo on a dark or busy background
- Logo files should be placed in /public/images/ in the repo
- For the nav: use the full-color logo at approximately 140px wide
- For the footer: use the white version at approximately 120px wide

7. Tailwind Config

The following `tailwind.config.ts` extends the default theme with brand tokens. Claude Code should use this as the base config for the project.

```
// tailwind.config.ts

import type { Config } from 'tailwindcss'

const config: Config = {

  content: ['./app/**/*.ts,tsx', './components/**/*.ts,tsx'],

  theme: {

    extend: {

      colors: {

        brand: {

          blue: '#285197',

          charcoal: '#333333',

          navy: '#1A1F2E',

          'blue-tint': '#EEF3FA',

        },

        gray: {

          light: '#F8F9FA',

          border: '#E5E7EB',

          mid: '#6B7280',

        },

      },

    },

  },

}
```

```
fontFamily: {  
  
  sans: ['var(--font-gilroy)', 'system-ui', 'sans-serif'],  
  
},  
  
maxWidth: {  
  
  content: '1200px',  
  
  narrow: '800px',  
  
},  
  
},  
  
},  
  
plugins: [],  
  
}  
  
export default config
```
